EPA I.D. No. MOD085910057

✓ MOD 099238784 - Muelle  
SA Lo.

Dear Mr. Ritchey:

We wish to inform you that the manufacturing process used at both facilities no longer produces any hazardous wastes as defined in 40 CFR 261.31 and 40 CFR 261.32. The St. Louis facility spent pickle liquor (K062) is being disposed of in compliance with 40 CFR 260.6 at the Chain of Rocks Water Treatment Facility (EPA I.D. No. MOT300010774).

At this time, we do not wish to amend or change our RCRA PART A Permit. The Company is simply going through a series of process changes and this letter is to advise you of the hazardous waste activity for the time being.

If you need any additional information, please contact the undersigned.

Sincerely,

Edmund G. Hughes  
Project Engineer
